V.A.T. Consultation

Naturally, the announcement of the imposition of this tax has created a lively debate on the pros and cons of VAT taxation and the potential impact it will have on business operations and the economy at large.

No one can argue that the GCC states are exposed to an abnormally high risk of fluctuations in the commodities market, particularly in oil and related petrochemical products, and taxation in some form is universally seen as the principal means with which regional governments can cushion the negative impact of fluctuations in commodity prices on their budgets and spending.

VAT is now the number one regulatory concern of any CEO, and it is driving demand for proper internal control

activities and robust financial reporting processes to satisfy regulators and stakeholders.

Our services in this field include, but are not limited to, the following:

- VAT Planning and Execution
- VAT Compliance & Review
- VAT Filing & Declaration

Company Liquidation

At Assist Plus we provide the services of liquidation of companies and the elimination of registration in the United Arab Emirates.

We cover all the required practical perspectives of the liquidation from accounting, legal and legislation. Liquidating of companies is not easy where it needs the appointment of a certified legal liquidator at the headquarters where the company is located, and the legal liquidator is named in a document appointed, as a decision of the General Assembly of the company or a judgment of the local court.

According to the law, it is a must to determine the decision to put the company under liquidation and appoint through a formal power of attorney a liquidator.

The liquidation may be quick and maybe gradual depending on the situation that the company has when deciding to liquidate.

Corporate Finance

We facilitate corporate finance advisory services right from deal origination to deal completion. We assist with capital formation, such as raising debt and equity for middle market businesses to large capital-intensive companies. We also advise our clients in buying or selling businesses.

Our services include:

- Financial Modeling & Valuation
- Mergers & Acquisition
- Feasibility Studies & Market Assessment
- Cost Optimization and Cost Reduction Enablement

Our specialists apply a detail-oriented approach that guarantees all finance documents are adequately examined and scrutinised to identify and resolve ambiguities that can cause potential problems later on, as well as to empower our clients in their decision-making process.
